

PCORE Bushing Repair- Fast, Exact & Economical

FAST

- Most times, a repaired bushing can be back in service weeks sooner than a new bushing could be delivered.
- Emergency re-gaskets are often completed in 1 week.

EXACT

- New bushings often require special modifications and adaptors in order to match needed dimensions. The repaired bushing already meets your specified dimensions.

ECONOMICAL

- Many parts on the original bushing can be reused, resulting in savings of up to 55% when compared to the cost of a new bushing.
- Repaired bushings come complete with the same warranty terms as our new bushings!
