

a **BETTER**
design.

...**HIGHER CONNECTIVITY**...
...**COOLER OPERATION**...
AND
...**EASIER INSTALLATION**...

Some **FACTS** to prove it —

- May be used on both 5/8" *and* 1" transformer studs
- Connects up to eight #6-500 MCM taps, along with up to three streetlight taps
- Rated for use with copper *and* aluminum phase wires (factory inhibitor standard)
- Superior electrical performance is the result of treads die cast directly into the latch, which increase contact surface area
- Secures the entire circumference area, rather than only a small portion as seen in most thread and setscrew style connections
- Made from high-conductivity and high-strength aluminum alloy
- Available as bare bar, or kitted with clear poly-vinyl (PVC) cover
- Installs with standard lineman speedwrench
