## Longitudinal Slotted Grate DG0675HD

We are pleased to announce our newest product the ADA compliant Longitudinal Slotted Grate designed for use with our 500, 600 and 700 series channels. The Longitudinal Slotted Grate has been engineered to provide superior impact resistance in a variety of pedestrian and heavy traffic load applications. As with all Polycast Systems, use of grating hold-down devices are strongly recommended.

When used in high velocity transverse sheet flow applications, the longitudinal slots create turbulence to improve entry of flow into the channel.

The Longitudinal Slotted Grate is ADA Compliant and considered to be High Heel Proof.

Pricing can be found in the currently published 0908.15A Dealer Price List.

## World of Concrete 2009

Come see us at booth number S12009,  
World of Concrete 2009 in Las Vegas  
Tuesday, February 3<sup>rd</sup> – Friday, February 6<sup>th</sup>.  
See you there!
