

Quazite®

Quazite® enclosures offer a number of advantages over enclosures made with conventional materials. They are lightweight, stable under freeze/thaw conditions, impact resistant, corrosion resistant, nonflammable and nonconductive. All Quazite® precast polymer concrete products meet or exceed the test provisions of ANSI/SCTE 77 2007 and most enclosures sized 30 x 48 and smaller are UL listed to the ANSI national standard. Reduced installation costs, longer service, and lower life cycle costs add up to a safer, more cost effective enclosure.

CUSTOM COMPOSITES™

Made with a UV resistant gel coat finish on female molds • Structural support ribs, sidewall ribs, and woven roving, make Custom Composites™ products durable, and rigid • Single phase transformer box pads • Single phase repair pads – allow repair of damaged pads without disconnection of power cables • Single phase multiple transformer pads • Three phase transformer box pads • Three phase Wind Farm pads • Switchgear pads: single and double opening • Ground Sleeves • Hill Holders • Looping pedestals • Secondary Pedestals

Sectionalizing Cabinets and Switching Pedestals meet ANSI specifications and integrity standards – accommodate all manufacturers 200 AMP & 600 AMP junctions through 35 KV, customizable with many options • Single and Two Phase Cabinets will accommodate up to 35 KV • Three Phase Cabinets – adjustable and inline parking stands available – smooth top available • All products are corrosion resistant, impact resistance, lightweight, reduce heat rise costs associated with solar radiation, non-conductive, flame resistant and virtually maintenance free.

COMCORE™

Comcore™ manhole covers, road plates, trench covers, and shoring systems are made of a unique composite material that has no scrap value and eliminates the incentive for theft. Comcore™ products are non-corrosive, non-conductive, not affected by extreme weather, temperatures or UV rays and have a long life span for years of service free use. Light for easy transport and installation, Comcore™ products reduce the risk of injury associated with products made of traditional materials making Comcore™ products a more cost effective, safer alternative.
