

Why Are You Still Using Porcelain . . .

... When Over 4,000 Miles of Lines Are Built on Hi*Lite® Insulators?

Hi*Lite insulators offer the advantages of polymers: lightweight, ease of construction and versatility in application.

They also offer more than other polymers: a patented live-silicone interface with 15 years of failure-free field experience, ESP™ rubber with the hydrophobicity of silicone and the mechanical strength and the excellent tracking and corona resistance of EPDM. Additionally, all Hi*Lite insulators have equal or better leakage distance when compared to porcelain.

Hi*Lite insulators . . . offering the benefits you want and the reliability you require.

Hi*Lite® XL-HP
Fully Sealed Design
High Pressure Washable
