

Utility-driven innovations and service for 60 years

SERVICE
years

CHANCE[®]

Celebrate with us our first 60 years of meeting electric utilities' needs for tools to build, maintain and operate.

In that time, Chance has been in first place with major innovations. First to replace wood hotsticks with fiberglass-reinforced plastic. First with demonstrators to provide training worldwide for transmission work by barehand and hotstick methods and distribution maintenance by hot-line-tools, rubber-glove and platform methods. First in grounding equipment for de-energized system maintenance. First with a free instructional videotape library.

Solving utility problems still drives the development of new Chance tools. Totally involved in tools for the industry, Chance takes part in Job Training & Safety schools and the evolution of standards set by ASTM, IEC, IEEE, NEMA and OSHA.

This landmark anniversary renews our commitment to remaining your first choice in tools.
