

Your Zone of Defense

THE
ZONE

Full line of protective grounding equipment for substation, underground, and overhead applications.

CHANCE[®]

We have what it takes to put you in a properly grounded zone for de-energized work on transmission and distribution systems.

First, verify the circuit is dead with a Chance hotstick-mounted meter. Next, create the equipotential zone with specialized Chance grounding equipment. Then, rely on the full line of Chance tools and insulated sticks you know so well for getting your hot-line jobs done.

We stay on top of OSHA and ASTM developments in temporary grounding standards. Our experienced demonstrators and engineers can address even your most challenging grounding needs.

Build your best defense zone with Chance on your grounding team.
