## New Digital Phasing Testers for 16 through 80kV applications

State-of-the-art electronics now make hot-line testing easier than ever. New-generation Chance Digital Phasing Testers for overhead and underground automatically display line voltage. The basic units, 16kV (C403-3369) and 40kV (C403-3370) Phasing Testers, present large direct-reading displays with backlight and hold features and an energy-saving sleep mode. For up to 80kV capability, you simply thread on Extension Resistors available as accessories. For your convenience, consider two prepackaged kits: The 16kV Kit (C403-3402) includes two bushing adapters, elbow adapter, shepherd hook, pigtail hook, two universal poles with storage bag, voltmeter tester, and DC hi-pot adapter. The 40kV Kit (C403-3403) includes the same components except the hi-pot adapter.
