New ARVI (Auto-Ranging Voltage Indicator) for 600V to 69kV

This smart instrument makes overhead and underground hot-line testing easier than ever. The ARVI's state-of-the-art electronics eliminate selector switches. A bright red light and audible tone indicate the phase-to-phase voltage class sensed by the ARVI (Cat. No. C403-3374). It automatically begins detecting at 480 Volts and displays one of these voltage classes: 600V, 4kV, 15kV, 25kV, 35kV or 69kV. It features automatic hold of the readings, a confirming self-test, a low-battery indication and an energy-saving sleep mode.
