# **CHANCE**<sup>®</sup> Telescopic Tools

More than sixty-five years of safety driven innovation and service are incorporated into Chance Telescopic Tools.

Chance Tools are dependable and rugged. Designed to meet the rigorous electrical and mechanical demands of daily use by crews. Chance foam-filled fiberglass poles are tested to the equivalent of 100kV per foot before they go into a hot-line tool. With Chance, you have the toughest, longest lasting, most dependable hot-line tools in the industry

Chance telescopic tool design includes features that make field use simple and trouble free. Our button locking system doesn't pinch fingers or damage gloves. Air cushioning action protects fiberglass sections when they are retracted, and our glossy surface is easily restored to its original luster after cleaning. Chance tool features provide years of reliable service.

Contact you local Chance representative to obtain more information. You'll see why Chance telescopic sticks "stand tall."
