This is the way compression tool use is supposed to be.

We've added further flexibility to our line of crimping tools with the VC6-350BP. It crimps lugs and splices to 350 MCM, and also includes a reversible "O" and "D" nib for H-tap connectors. Tool comes complete with impact resistant plastic case, battery charger, extra battery and three year warranty. Batteries charge in less than 25 minutes.

The dieless nibs of the

VERSA-CRIMP[®] Crimping Tool system allows users to advance a tool opening in a continuous movement compressing the connector and conductor until the proper pressure for the crimp is achieved as determined by a pre-set hydraulic valve. A single VC6FT tool accommodates a range of #10 STR aluminum through 750 kcmil aluminum/copper without tedious die set changes or other tool modifications.
