Meter Claw™ and Safetyshield™ Barrier

Added protection for pulling and installing electrical meters

- Transparent polycarbonate 24" diameter barrier for full view and protection
- Ergonomic handles for stable control, leverage and minimal fatigue, help prevent injuries from repeated pulls/installs
- Fit single and multi-phase meters (residential and commercial)
- Non-conductive jaws grasp back of meter base not just bezel

NOT RECOMMENDED:
Improper/unsafe methods for loosening and removing meter by hand can result in injury/death due to breakage and electrical arcing.

EASY 4-STEP PROCESS TO MAINTAIN CONTROL WITH METER CLAW™ AND SAFETYSHIELD™ BARRIER

1
Positioning on residential meter

2
Closing non-conductive jaws with actuating rod

3
Removing/pulling meter

4
Meter removed from socket base

NOTE: The two black ball-type handles may be grasped if using Meter Claw without Safetyshield barrier.
