

# Then. Now. Always.

## TO THOSE WHO CLIMB™

Line crew work got easier and safer when Chance started making hot sticks. That was 70 years ago and we're dedicated to continuing that legacy for each new generation of lineworker. We still lead the industry, driven by our accumulated experience and employing the latest advances in technology and materials for practical tool designs.

"Work it hot or ground it cold" – we make the tools you need. That's our job and we're "sticking" to it.

For energized barehanding, hotsticking or rubber gloving. For de-energized temporary grounding. For overhead and underground construction and maintenance.

Chance tools were on the job before anyone alive was. And Chance tools will be on the job long after, too. That's our commitment to you, yours and those who follow.

For safety and productivity, put Chance® tools in your crews' hands.

# CHANCE®
